Personalised account management

With Ausgrid Business Services you have your own personalised Account Management team, available every day of the year.

Your Account Management team will individually customise solutions to meet your specific needs. With our team of over 150 specialised data management and field technicians, supported by our dedicated Customer Relations Management Group, you can take full advantage of our services through the deregulated, competitive Australian Energy Market.

Measure, monitor & manage

Tailor made solutions to reduce energy costs

There are many ways to reduce your energy costs, such as utilising more energy efficient equipment, scheduling operations during low energy cost periods and reducing peak demand. They all require knowledge, accurate information, decisions and management, and they are different for every business.

Your own personalised Ausgrid Business Services Account Management team will provide you with tailor made solutions to assist you to monitor and manage your energy usage, and reduce costs.

How can Ausgrid Business Services help?

Electricity metering – Complete supply, installation and maintenance solutions, using high quality, reliable testing and instrumentation services.

Data management – Remote and timely meter reading data collection and reporting to meet your business requirements from one of Australia's leaders.

Exception reporting notification – Identifying energy supply anomalies, boosting productivity and saving on maintenance and replacing damaged equipment.

Internet based energy reporting – With WebGraphs you get user generated energy consumption graphs and reports created from data updated daily. View now on line at www.webgraphs.com.au

Environmental reporting – Viewing your energy consumption patterns and associated CO² emissions, and identifying ways to reduce your environmental impact.

Energy audits – Reduce energy consumption with an inspection of your premises, identifying areas of inefficiency and overuse to establish best practice strategies.

Orica Limited

Orica Limited, one of the top 50 companies listed on the Australian Stock Exchange, is Australia's leading supplier of mining services, chemicals and fertilisers. When Orica required metering services which could both add value to their business and be delivered across multiple sites, Ausgrid Business Services met the challenge with a tailored metering solution and timely personalised account service.

"When we compared Ausgrid Business Services with other providers, we were impressed by Ausgrid Business Services' ability to deliver our energy consumption data in a format that was meaningful and valuable to our business. Ausgrid Business Services' ability to provide additional services like WebGraphs, and their Account Manager's personalised approach to providing us timely responses to our requests meant that Ausgrid Business Services was the obvious choice for our metering."

Ken Moyle

Utilities Procurement Manager
Orica Australia Pty Ltd

Sydney Markets

Sydney Produce Market, Sydney Flower Market and Sydney Growers Market, managed by Sydney Markets Limited, comprise more than 700 businesses supplied by over 20,000 local and interstate growers. Over the past 10 years, Sydney Markets has relied upon Ausgrid Business Services for timely and accurate metering and usage data and load distribution surveys across its 42 hectare site.

“Ausgrid Business Services reads in excess of 600 meters and has continually met all our needs with a very responsive reporting system which is critical to our business needs. Not only does Ausgrid Business Services report on usage and cost, they also offer assistance in recommending services that our tenants can utilise to obtain the best tariffs to help minimise their business costs.”

Marilyn Loch

Site Services Manager
Sydney Markets Limited

Service our customers appreciate

Our clients are some of Australia's best known businesses and utilities, including end use consumers, energy retailers, electricity networks and electricity generators.

Ausgrid Business Services currently have well-established professional working relationships with all of the major retailers who participate in the Australian Energy Market (AEM). As such, if Ausgrid Business Services is selected as Metering Service Provider for a customer, Ausgrid Business Services is pleased to work directly with end use customers and their chosen electricity retailer to ensure a timely and accurate transfer of sites. All work is undertaken with a view to meeting the deadlines presented so that no default electricity tariff rates are to be paid.

Ausgrid Business Services has participated in the Australian Energy Market (AEM) since its inception and is fully accredited by AEMO to supply Metering Provision and Meter Data Agency Services for the contestable market as such, Ausgrid Business Services are well placed to provide an accurate, efficient and trouble-free metering service time and time again.
